Hey ok so we need some more variations of the landing page because we think the one you've created right now appers too generic and won't appeal to our audience. Kindly acknowledge!

Filters Sort by Order 

● Active orders

To program a 2D game in XCode / Swift

Steffan M.

It is a turn-based role-playing game (RPG) with an online connection (currently Firebase) in the style of Phantasy (SSI). A demo exists, but since I'm not a professional programmer, the code is pretty inflexible, so I'm looking for capable programmers to implement the concept into a clever codebase. (Graphics and items should be created later via a database).
